

FULL HOUSE: THE GROWTH OF THE INMATE POPULATION IN NSW
 Key Issues With Metropolitan Special Programs- Long Bay Taken From The
 Report
<http://tiny.cc/8hyhz>

METROPOLITAN SPECIAL PROGRAMS (MSPC) – LONG BAY		
<ul style="list-style-type: none"> • Accommodates all classifications of inmates. • MSPC Area 2 is one of three areas at the MSPC, each providing therapeutic programs. • MSPC 2 provides a range of therapeutic programs, which are part of statewide strategies to address specific behavioral issues of violent offenders and sexual offenders. Also houses transit inmates for medical appointments and inmates with intellectual disabilities. MSPC 2 has a well-developed industries capability, giving inmates the opportunity to participate in a range of Corrective Service Industry (CSI) commercial business units.” – 21 		
As of July 2014, MSPC 2 “was operating at 71% over its design capacity”		21
MSPC 1 was built in 1909, design capacity: 228 vs. current operational capacity (beds) 300		26
MSPC 2 was built in 1909, design capacity: 172 vs. current operational capacity (beds) 294 <ul style="list-style-type: none"> • Limited alternative options other than to place segregated inmates in one-out cells in the developmentally disabled accommodation area, arguably inappropriate. • First 6 months of 2014, MSPC 2 was locked down completely once and practically 56 times → these unscheduled lockdowns exacerbate already significant lock-in periods of inmates. 		26
		40
		43
MSPC 3 was built in 1909, design capacity: 207 vs. current operational capacity (beds) 381		27
Minimum-security inmates at MSPC 2, 3 and 4 are locked in their cells from 2:30pm on weekends, restricting their recreation and visitation activities, which is not proportional to their security classification.		38
The physical environment in which minimum-security inmates at MSPC 2, 3 and 4 are kept does not reflect their security classification. They are kept “behind a masonry perimeter with razor wire in a manner similar to that which might be found in a maximum-security centre.”		38
Only 1 position for 24-hour nurse at the long bay complex. [Insufficient needs to increasing numbers and the changing profile of inmates at long bay complex]		51
Waitlist for custodial health services – June 2014 <i>By days (jan-jun 2014)</i>	MSPC AREA 2	53
Primary Health Nurse	62	5.28
P/Visiting Medical Officer	26	
D&A Specialist	5	
Psychiatrist	28	
Mental Health Nurse	105	
Average waitlist for admission to The Forensic Hospital	99 days	

Inmates had not had access to oval for up to 18 months.	58 5.62
At MSPC 2 , approx. 50% of inmates surveyed said that they were unaware of their allotted case manager.	65 6.33
OS&P cover a large range of responsibilities and geographic areas → At MSPC 2 , OS&P support community corrections in far western Sydney.	66 6.40
At MSPC 2 , there is a lack of formal accountability in the referral system (due to no receipted communication/acknowledgement)	67 6.47
